Inviting Views of Information Needed to Vote on Pay

Dear NYSSA Member,

The Shareholder Forum has just initiated an independent survey of a wide sampling of marketplace investors to help participants in their "Say on Pay" program understand what information corporate managers and research professionals should be providing. It will be very useful to know how NYSSA members, as professional analysts, view the requirements for decision-making information.

Responses from the NYSSA community will be anonymous, but will be registered through a different web site link so the Shareholder Forum can analyze NYSSA responses separately from other participant responses such as the pension fund members of the Council of Institutional Investors.

Please take 2 minutes to offer your views of the importance of information alternatives. The questionnaire can be reached by this [link](#).

Thank you for your participation.
